Excuses

The responsible organization encourages users who find errors or apparent omissions to notify it at the addresses given in the statement of responsibility.

The list is in USA English alphabetical character-by-character sequence by the contents of the Company field. The list is neutral regarding the quality of the companies and products listed. The list only points users to sources of software that claim to support JEDMICS C4 format. The list does not rate or rank software as to the degree of support for C4 format or for any other quality factors. However, software features that directly affect the suitability of the product for some purposes are noted in the Comment field.

At this time the list gives only company names and World Wide Web uniform resource locators (URLs). The responsible organization needs feedback from users on whether this is sufficient or if additional contact information is required (such as postal addresses, telephone numbers, and

electronic mail addresses).

Discussion of changes since 1998-01-23

Engineering Animation Inc. purchased Rosetta Technologies Inc. The former Rosetta entry is now under Engineering Animation Inc.

Image Machines Corporation entry has been clarified. The ImageMax product is now correctly assigned to ImageMax, Inc. instead of Image Machines Corporation.

IMSI has dropped the HiJaak Graphics Suite 95 product. HiJaak Pro remains on the list at the same URL.

Informative Graphics Corp has enhanced its Myriad product line, splitting off a Myriad Engineering Viewer. The URL for the description of this viewer has been enhanced in this edition.

Snowbound Software Corporation has a new product listed in this edition. It's the SnowView image viewer. Snowbound has also split its RasterMaster library into two levels, Gold and Platinum. Only the Platinum library supports JEDMICS C4 format.

Thanks to Patrick Pidduck (email: `ppidduck@spicer.com`) for information about his company's Imagenation product.

Scangraphics Inc has dropped its Scangraphics View for Windows product from its web home page. However, Scangraphics View for Windows is still available for download at a slightly different URL from before. Users must type this full URL into their browsers, since Scangraphics no longer links to this page from its home page.

The following companies changed the name they give to JEDMICS C4 format: Cartesian Products Inc, Cimmetry Systems Inc, and InterData Access Inc. InterData Access Inc also added the version number to the link button for their IntraVISION product.

The following companies have entirely new entries in this edition: AlphaData Technologies, Inc., Cimage Enterprise Systems Ltd, FORMTEK, Inc., GTX Corporation, ImageMax, Inc., InterLinear Technology Inc., Oce Group, Photomatrix, Rasterex (International) a.s, softelec GmBH, and TMS, Inc.
